

MaX Meeting

Enhanced Conferencing and Collaboration

With today's distributed work forces and dispersed customer bases, unified communications and collaboration tools are on the rise in small, media and large businesses but IT managers and employees are expecting more.

- » Up to 200 attendees per meeting
- » Tightly Integrated into MaX UC clients
- » Large-scale, feature-rich 'webinar' options

Scalable and Brandable

Fully integrated into MaX UC clients, MaX Meeting features high-quality video conferencing, presentation and screen sharing plus complete call recording. MaX Meeting can also stand alone, with a decoupled client offering enabling a broader addressable market for these collaboration options, when a feature-rich UC client is not required.

MaX Meeting Webinars are different from other webinar solutions because of the incredible quality, reliability, scalability, and affordability. Seeing the presenters makes a world of difference in building personal connections, engagement, and trust. MaX Meeting webinars scales up to 100 live video panelists and packages that scale up to 10,000 view-only attendees.

Without the need to manage a single server, MaX Meeting can also provide interfaces to your customer's legacy H.323/SIP conference bridges or replace them with a complete, low-cost, conference room system.

- » Extend the reach of legacy systems
- » New, low-cost, Room System options

With MaX Meeting and Webinars, users can:

Present with confidence: Focus on your content, not the technology.

Customize and brand: Flexible registration management

Give a better, more interactive experience: Unique multimedia and interactivity features lead to better sales.

Generate more leads: Reach more people and grow your business with unlimited audiences.

Features

HD Voice and Video Conferencing

Up to 100 live video panelists can share their web-cam and interact with the audience

Scalable

Options to select 100, 500, 1,000, 3,000, 5,000, or 10,000 attendees

Screen and Application Sharing

One-click HD screen sharing – even share video and audio clips with ease

Breakout Rooms

Allows you to split your MaX Meeting up to 50 separate sessions with a maximum of 500 participants in a session.

Closed Captions

Host can type closed captions or assign others to type closed captions, notifying participants once closed captions are typed

Customized Branding

Add your logo and customize emails and registration forms

Flexible Registration Options

Webinar can be set up with or without registration, registrations can be automatically or manually approved

Practice Session

Meet with other panelists to prep for your webinar

Host Controls

You can mute/unmute panelists, and promote attendee to panelist, giving them audio & video capabilities for enhanced engagement

Chat

Private and group panelist chat (can be enabled for attendees too)

Polling

Receive immediate feedback from attendees and share audience input

Q&A

Attendees ask questions, and hosts or panelists can respond with live or text answers

Remote Desktop Control

Request or give desktop control to support and troubleshoot issues on remote systems or collaborate live with your team on documents

Recording

Record locally in MP4 or MP4A format, and promote to additional audiences

Reporting

Get reports on registrants, attendees, polling, performance, and Q&A for follow up

Security

End-to-end 256-bit AES encryption safeguards all log-in information and webinar session data
